

## Appendix D

# Source Code File Listings

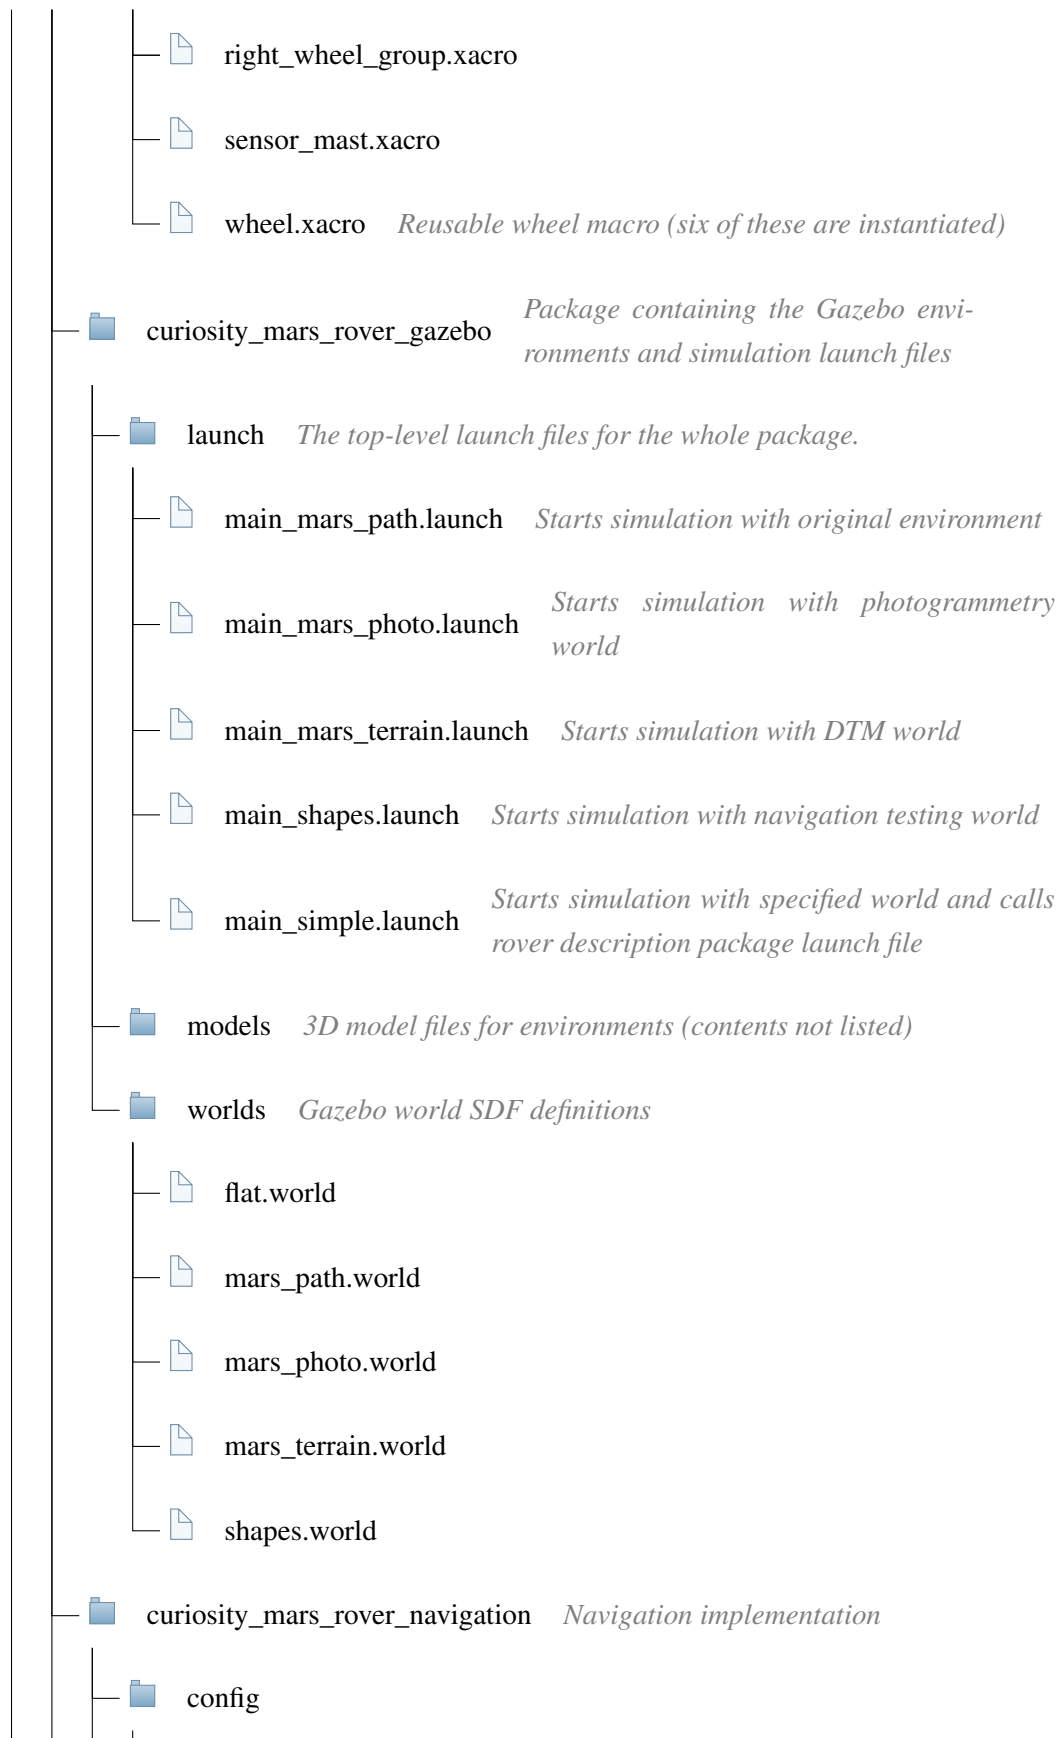

The files and folders included in the software package are listed below with information about the purpose of each. Any CMakeLists.txt or package.xml files are excluded as they are mainly autogenerated. The contents of folders that only contain imported files are also excluded.

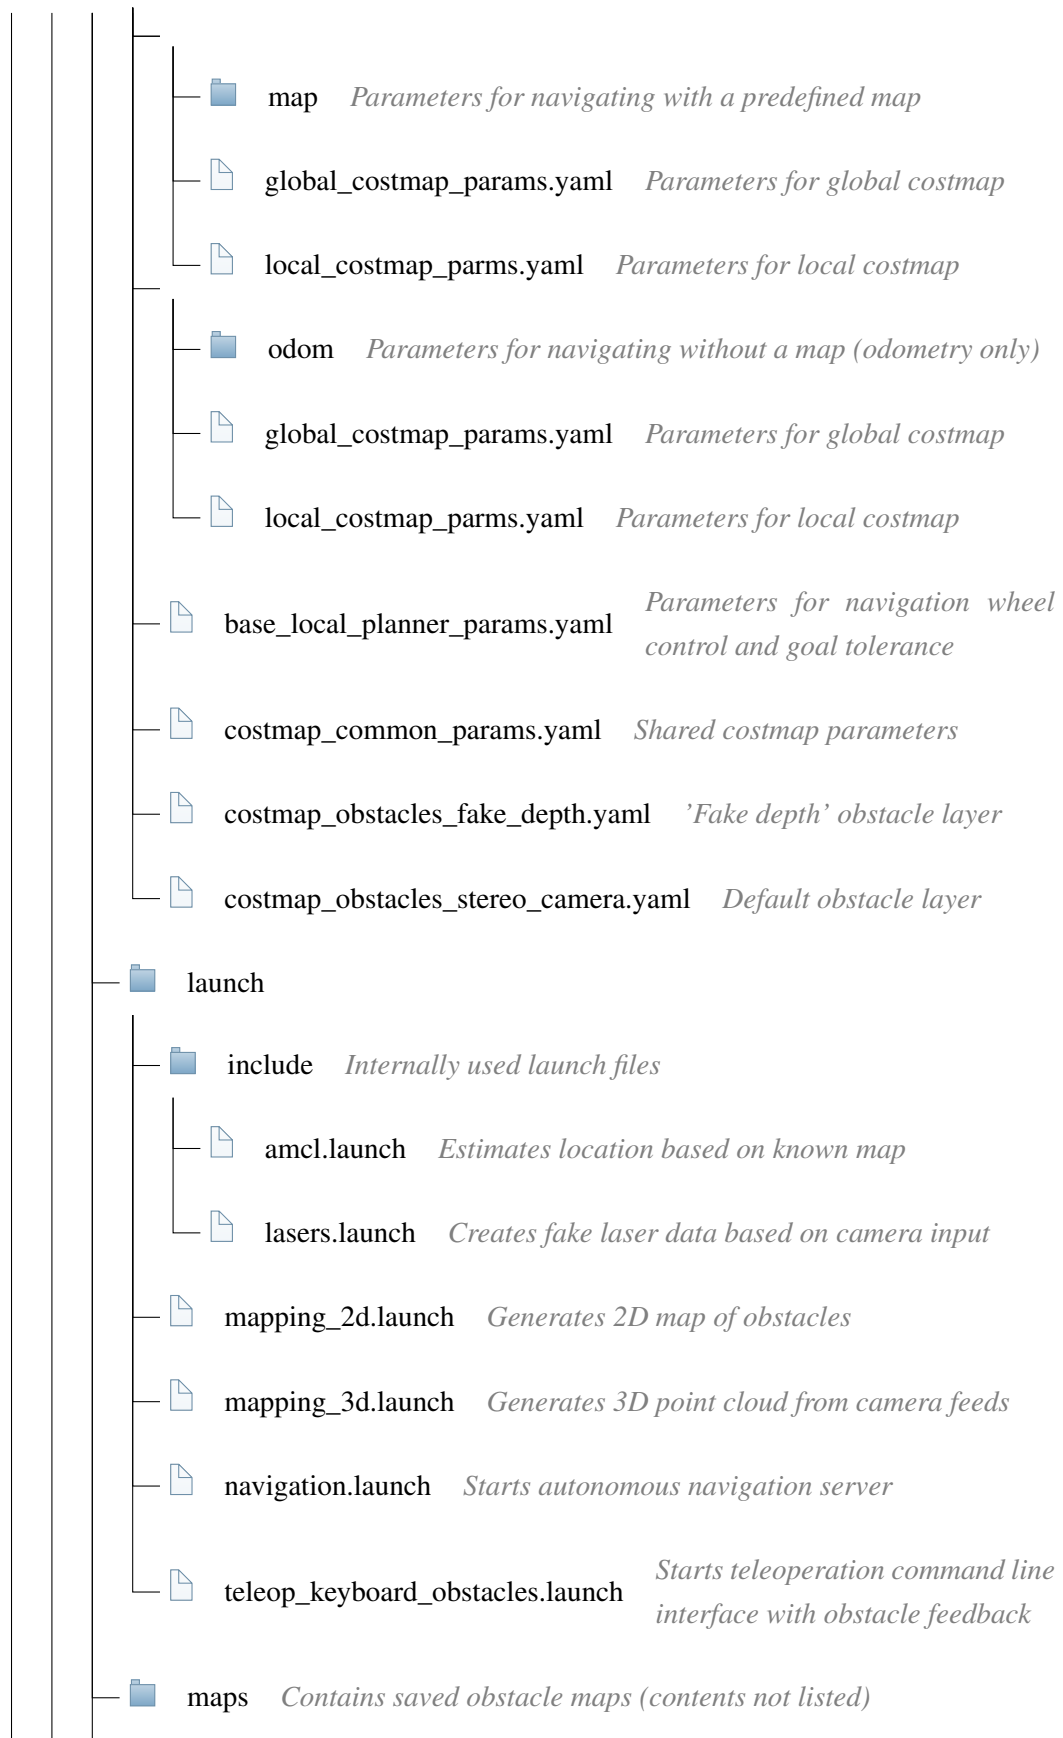

(continued on next page)

		arm_and_mast.py	Create services for control of rover arm and mast
		gps_publish.py	Publishes the rover's exact location coordinates
		panorama.py	Calls panorama action server and rotates mast
		teleop_keyboard_mast.py	Provides rover mast teleoperation
		srv	ROS service messages
		Arm.srv	Messages for updating arm position
		Mast.srv	Messages for updating mast position
		curiosity_mars_rover_description	Package containing the rover definition and 3D models
		launch	
		curiosity_mars_rover_spawn.launch	Creates instance of Curiosity rover in current Gazebo world
		meshes	Imported rover 3D models (contents not listed)
		urdf	Rover definition URDF/Xacro files
		arm.xacro	
		chassis.xacro	Main body of the rover
		curiosity_mars_rover_properties.xacro	Common parameter macros
		curiosity_mars_rover.gazebo	Rover parameters for Gazebo
		curiosity_mars_rover.xacro	Main URDF rover definition file
		left_wheel_group.xacro	
		macros.xacro	Reusable functionality such as cameras

(continued on next page)

scripts	
obstacles_service.py	Service that returns obstacle blocking status
teleop_keyboard_obstacles.py	Teleoperation code that utilises the obstacle service
srv	
Teleop.srv	Service message for teleoperation
test	Unit tests
navigation_test.py	Simple autonomous navigation tests
curiosity_mars_rover_viz	Visualisation package
certs	Example security certificates (contents not listed)
launch	
marsviz_mars_path.launch	Launch entire simulation with MarsViz
marsviz_mars_photo.launch	
marsviz_mars_terrain.launch	
marsviz.launch	Launch MarsViz web server
rviz.launch	Launch Rviz with specified configuration
rviz	Rviz configuration files
curiosity_mars_rover_fake_depth.rviz	Alternate Rviz configuration for fake depth cameras
curiosity_mars_rover_lite.rviz	Simple Rviz layout (single-camera)
curiosity_mars_rover.rviz	Default Rviz layout for navigation testing
